The preparation of interim financial statements in conformity with TFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

SIC 25 Income Taxes - Changes in the Tax Status of an Entity or its Shareholders

Accounting Treatment Guidance for Transfers of Financial Assets

These accounting standards, financial reporting standard, accounting standard interpretations and accounting treatment guidance do not have any significant impact on the financial statements, except for the following accounting standard.

TAS 12 Income Taxes

This accounting standard requires an entity to identify temporary differences arising from differences between the carrying amount of an asset or liability in the statement of financial position and its tax base in order to recognise the tax effects as deferred tax assets or liabilities subjecting to certain recognition criteria. The Company and its subsidiaries have changed this accounting policy in this current quarter and restated the prior year's financial statements, presented as comparative information, as though the Group had initially recognised the tax effects as deferred tax assets or liabilities. The cumulative effect of this change in accounting policy has been presented in Note 6 to the financial statements.

4. SINGNIFICANT ACCOUNTING POLICIES

The interim financial statements are prepared using the same accounting policies and methods of computation as were used for the financial statements for the year ended 31 December 2012, except for the change in the accounting policies due to the adoption of TAS 12 Income Taxes as follow:

Income tax

Income tax expense represents the sum of corporate income tax currently payable and deferred tax.

Current tax

Current income tax is provided in the accounts at the amount expected to be paid to the taxation authorities, based on taxable profits determined in accordance with tax legislation.

Deferred tax

Deferred income tax is provided on temporary differences between the tax bases of assets and liabilities and their carrying amounts at the end of each reporting period, using the tax rates enacted at the end of the reporting period.

The Group recognise deferred tax liabilities for all taxable temporary differences while they recognise deferred tax assets for all deductible temporary differences and tax losses carried forward to the extent that it is probable that future taxable profit will be available against which such deductible temporary differences and tax losses carried forward can be utilised.

At each reporting date, the Group review and reduce the carrying amount of deferred tax assets to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised.

The Group record deferred tax directly to shareholders' equity if the tax relates to items that are recorded directly to shareholders' equity.
